

Cadbury (Kraft Foods)

Kraft Foods is the world's second largest food company with annual revenues of \$49.2 billion. They operate in more than 75 countries and employ 127,000 individuals worldwide.

Kraft Foods in India required a feature rich and highly secure access control system to secure their facility. Based on the customer requirements, CEM Approved Reseller Neural Integrated Systems chose AC2000 access control and security management system for the Kraft Foods facility.

CASE SUMMARY

Location:

India

Systems Installed:

AC2000 access control system

AC2000 AED (Alarm Event Display)

AC2000 VIPPS (Visual Imaging Pass Production System)

AC2000 WEB Visitors

Hardware Installed:

120+ eDCM 300 (Door Control Module)

Introduction

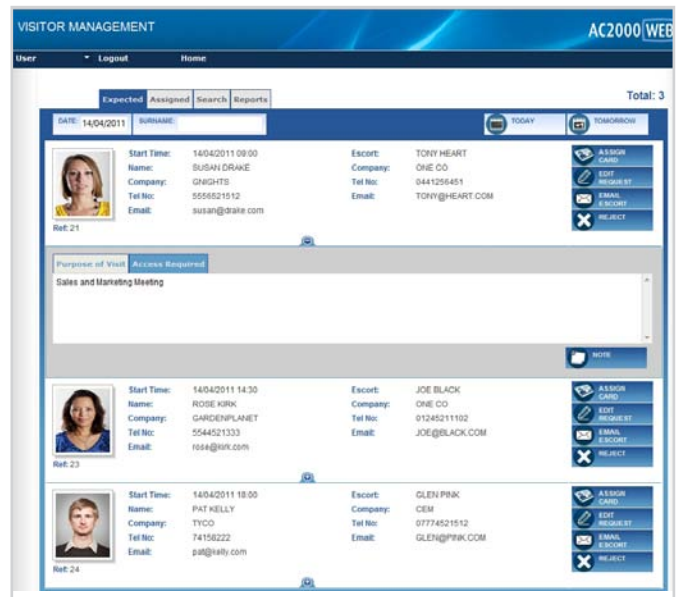

AC2000 access control and security management system is continuously developed to meet the most complex of security needs providing a highly stable, proven solution for Kraft Foods. AC2000 offers a powerful suite of client and browser based applications, supports unlimited cardholders and is highly customisable.

Solution

Applications offered include AC2000 AED (Alarm & Event Display), AC2000 VIPPS (Visual Imaging Pass Production System) and the AC2000 Zone Monitor application which shows security what staff work in which areas/zones.

AC2000 VIPPS allows the user to produce permanent and temporary ID badges for staff and visitors to the Kraft offices and manufacturing facilities. This will ensure all those on site have an access card with the correct privileges to gain admission to areas throughout the building. If someone forces a door at an access point, the AC2000 AED application can be used to view the alarm and respond to it immediately in real time.

AC2000 also provides access to AC2000 WEB, a suite of powerful and fully integrated browser based applications. AC2000 WEB.

Visitors provides a powerful web based tool to control and monitor visitor access from any location. AC2000 WEB Visitors is a cost effective way for multiple users within a facility to manage visitors without having dedicated access control software installed. This powerful application allows the addition of new visitor details, scheduling of visits, a multitude of reports, the issuing of cards and the ability to remotely upload visitor images via the web prior to a scheduled visit and much more.

CEM hardware

To secure doors throughout the factory, Cadbury-Kraft Foods chose CEM eDCM 300 (Door Control Modules). The eDCM 300 low cost, two-door intelligent controller is designed to interface third party readers with the CEM AC2000 system range.

Utilising existing Ethernet connectivity without the need to set up additional cabling, the eDCM 300 is extremely easy to install. With an internal database to hold offline transactions the eDCM 300 communicates directly with the AC2000 server, ensuring 24/7 card validation at all times. This ensures that the factory is always kept secure. With the CEM AC2000 security management system installed, the prestigious Kraft Facility has the highest of security measures in place.

“As a CEM Approved Reseller, we are pleased to be in the position to offer Kraft Foods a fully integrated and highly proven security solution using the CEM AC2000 system.”
