

AC2000 WEB Personnel XML Export Personnel Data Export

Key Features

- Simple and easy tool for exporting 'personnel' and card details into an XML file
- The XML tool allows cardholder records to be exported by company, department, card format and card status
- Filtering options based on various card status: Current, About to Expire, Lost or Stolen, and Expired
- Additional option to include Image export
- Choice between standard XML format or CEM XML format (for use with the AC2000 XML Import interface)
- Provides a simple but powerful tool to interface with Human Resource systems, card management systems or stand alone AC2000 systems

The AC2000 WEB Personnel XML (Extensible Markup Language) Export tool provides a simple and efficient way to export cardholder's details, from AC2000, to a simple XML file.

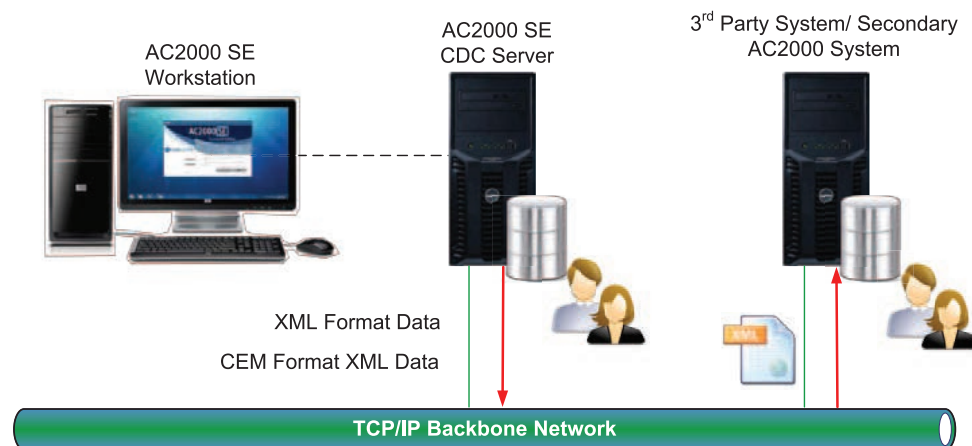

System users can manually export AC2000 cardholder data in a standard XML format or in CEM XML format, which may be used by a secondary AC2000 system. Users can filter the type of data exported from a number of selectable options, ranging from: Company, Department, Card format and images. It is further possible to filter cardholders export data based on different card status for example: current card, about to expire card and Lost or Stolen card.

AC2000 WEB Personnel XML export tool makes it easier for AC2000 to integrate with third party systems, such as a Human Resource System or a card management system.

It also allows AC2000 to share and update information with other AC2000 systems, which have limited WAN connectivity, via the CEM XML import format.

Requirements

- AC2000 SE v6.6 software and upwards
- AC2000 AE v6.6 software and upwards
- AC2000 Lite v6.6 software and upwards
