

AC2000 victor Interface

American Dynamics victor only video solution

Key Features

- Associate access control alarms with live video footage
- Uses AC2000 External Systems application to forward alarms to victor, including alarms generated by 3rd party AC2000 interfaced systems such as Intruder Panels
- AC2000 devices can be imported and placed on Victor graphical maps.
- AC2000 card holder details can popup in victor rolling transaction display, thus showing both live video and enrollment photo.
- victor can be configured to play a video salvo, perform a video tour, and live camera popup footage upon an AC2000 access control alarm being triggered
- The CEM AC2000 victor interface allows victor users to remotely open/close AC2000 controlled doors
- victor can generate reports on AC2000 devices

The AC2000 victor interface allows access control alarms to be sent to the American Dynamics victor only video solution where they can be associated with video actions. Additionally, the AC2000 victor interface allows control of AC2000 devices from within the victor client, supporting access control features such as remote door Lock/Unlock and Oneshot (remote short door open).

American Dynamics victor Client

victor is a game-changing unified security and surveillance solution. With the powerful victor client, you get the unique ability to view, manage, and control live/recorded video from Intellex digital video recorders and VideoEdge network video recorders. Display analog and IP video simultaneously with common feature set, no matter what the codec (H.264, ACC, MJPEG, MPEG-4); even mixing and matching technologies. All in one location without toggling between separate client applications.

What does the CEM AC2000 victor interface involve?

The AC2000 victor interface is based on CEM victor Integration Component which is required to be installed on all victor Client machines.

AC2000 victor Add-In Component

The AC2000 victor Add-In component allows victor operators to quickly and easily perform functions such as remote door open – Oneshot and Lock/Unlock Door. Oneshot is a remote short door opening feature of the AC2000 system and grants access based on the default door open time, just as if a cardholder had swiped their card on a card reader.

How does it work?

Any supported alarm configured via AC2000 External Systems can be sent across to victor where it can trigger actions such as live camera popup, video salvos, and video tours. Using the Victor client application AC2000 alarms to be associated with video footage on the victor Client.

Access control Alarms

- 10 Duress Alert
- 11 Tamper Alert
- 12 Lost Stolen Alert
- 13 Offline Alert
- 14 Door Held Alert
- 15 Panic Alert
- 16 Door Forced Alert
- 17 General Alert
- 18 Pin Alert
- 19 Break Glass Alert
- 20 Fire Alert
- 21 Intercom Alert

Intruder Alarms

- 30 SIA Tamper Alert
- 32 SIA Holdup Alert
- 34 SIA Panic Alert
- 36 SIA Burglary Alert
- 38 SIA Galaxy Alert

Generic Reader Alerts via victor alarm priority

- 0 General Alarm type 1
- 1 General Alarm type 2
- 2 General Alarm type 3
- 3 General Alarm type 4
- 4 General Alarm type 5
- 5 General Alarm type 6
- 6 General Alarm type 7
- 7 General Alarm type 8

AC2000 card readers and controller icons

AC2000 card readers and controllers are imported along with icons thus all configured devices can be added to victor graphical map displays.

Rolling transaction display

The interface supports card holder details, thus AC2000 personnel details and enrollment photograph can be displayed on victor rolling transaction display along with live NVR feed for example.

The AC2000 victor interface also allows access control alarms to be prioritised. So on victor, instead of configuring a salvo for 10 different alarm types you assign a salvo once to an alarm priority and group all alarms under that priority. Additionally, the victor Client can generate reports on AC2000 devices.

Access control and video management

The AC2000 victor interface offers customers an integrated security platform where you can open and close doors on the access control system via the victor video solution.

Requirements

CEM victor Install CD

AC2000 AC2000 Airport AC2000 Lite	V6.8/ v6.9	V7.0	V7.1	V8.0	V10.0
Integration uses	4.4.1	4.6.0 4.7.0	4.8 SP1 4.8.1	4.9.1 5.0.0	5.2
