Features that make a difference:

- Multifunctional access terminal with integrated biometrics
- Controller, advanced IP card reader and single biometric solution all in one that meets requirements for three stage identity authentication (card, PIN, and biometric verification)
- Fast card and fingerprint verification, uses 1:1 fingerprint match at the door
- Secure storage of fingerprints on the central AC2000 server and on the emerald internal database
- Fingerprint module gives a high resolution scan with FIPS201 approved biometric algorithm
- Durable enough for indoor or outdoor usage with an IK06 vandal resistance rating, and IP65 dust and water resistant rating
- User-friendly 4.3” capacitive LCD touch screen
- Intuitive Graphical User Interface enhancing user experience at the door
- Scramble keypad option for Personal Identification Number (PIN)
- Available with onboard PoE+ technology to power the terminal and additional door furniture
- PIR motion detection
- Remote upload of new firmware directly to the reader with on-screen indication
- Maintenance Information / Security Intelligence Point
- Ability to display live video at the workstation on intercom request, when interfaced with CCTV system (available with AC2000 v6.7 & upwards)
- Ability to display advertising/ information announcements and personal messages

emerald TS100f is a multifunctional touch screen access terminal with fully integrated biometric. Used in conjunction with CEM Systems AC2000 security management system, the emerald TS100f uniquely provides users with a wide range of functions, all in one powerful device that controls access to restricted areas where an additional biometric layer of security is required.

Featuring a controller, advanced IP card reader and single biometric solution all in one, the emerald TS100f meets requirements for three stage identity authentication (card, PIN, and biometric verification) using one device.

The emerald TS100f has a bright 4.3” graphical LCD touch screen to display predefined messages and icons to cardholders depending on access privileges. Its built in mini PIR sensor provides energy saving motion detection and a multi-coloured LED provides users with a visual indication of access status. With hardened glass and an antiglare coating, the emerald TS100f is durable for indoor and outdoor use.
Off-Line Card Validation
The emerald TS100f has a large internal database that enables it to operate in off-line mode. In off-line mode the terminal can hold up to 123,000 card holder records with 2 fingerprint templates for each card holder.

PIN & Fingerprint
This special emerald enhancement allows using emerald TS100f terminal without a card, where the user must enter their special designated 6-digit PIN number followed by a fingerprint verification. Where necessary, this removes the need for a physical card while maintaining a high level of security at the door.

Fully integrated biometrics & access control solution
The emerald TS100f features a controller, advanced IP card reader and fingerprint module all in one device.

Single process & network solution
Fingerprint enrolment is captured and stored via the AC2000 access control system at the same time as cardholder enrolment. This offers clients a single solution and eradicates the requirement to purchase a separate biometric reader and software application to link to the access control system.

Power over Ethernet Plus
The emerald TS100f is available with onboard Power over Ethernet Plus (PoE+) technology allowing the terminal and additional door furniture* to be powered using a single Cat 5e/6 cable at the door.

Multi Date Check
As an additional safety and security layer applied on top of system card validity checks, this mode allows the emerald to check the validity of any additional criteria such as training certificates or contracts that might be required at the site. System administrators can easily configure Multi Date Check using the dedicated intuitive AC2000 Web interface and run detailed reports on the configured Multi Date Check criteria and expiry dates, to ensure that personnel’s certificates and permissions stay up to date. Whether it’s applied for an individual cardholder or company-wide, additional date checks will take place after a valid transaction and a detailed result message will be displayed on emerald screen. This feature is only available with AC2000 v7.0 and above.

Time & Attendance
In T&A mode, the emerald allows users to select either the IN or OUT transaction on a single terminal, before swiping their cards. Depending on the selection, the emerald will allocate valid transactions against either the IN or OUT swipe. System administrators can then easily report on the T&A activity using AC2000 Time and Attendance module or system reports. For highly secure locations, Time & Attendance mode can work in conjunction with Fingerprint verification and other modes such as PIN or Image on Swipe. (T&A is a dedicated door mode, emerald will not control door access when in T&A mode.)

PIN as Card
PIN as Card is a special emerald feature, offering cardless verification using a unique 6 digit PIN to verify transactions. Where necessary, this removes the need for a physical card while maintaining security at the door.

Emerald Link
Emerald Link allows operators to activate passenger mode at both sides of the door while providing visual feedback of the remaining passenger time. Emerald Link is the deployment of two emeralds back to back in passenger mode to control a single door. The emeralds communicate with each other over Ethernet using secure 128-bit AES encryption. Alarms generated on either emerald are visually displayed on both sides of the door.

Requirements
• AC2000 Airport v7.0 and upwards
• AC2000 v7.0 and upwards
• AC2000 Lite v7.0 and upwards
• CEM S610f Validation Reader
• RTC Ethernet Reader Controller
**Specification**

**Physical**
- **Size**: 240 x 108 x 49mm (At widest point)
- **Weight**: 600g (approx.)
- **Housing**: Flame retardant polycarbonate, with UV stabilisation, RoHS compliant, and PBB/PBDE free flame retardant system
- **Capacitive, light touch, 4.3˝ Diagonal, 480 * 272 square pixel 16 bit colour**
- **LED Indicator**: High intensity multi-colour LED indicator
- **Colour**: Black
- **Voltage**: 10-14V DC

**PoE Version**: when powered from IEEE802.af compliant source
- **Current**: 350 - 550mA (Typical) 860mA (Peak)
- **Current available to power door furniture**: None

**PoE+ Version**: when powered from IEEE802.at source
- **Current**: 350 - 550mA (Typical) 860mA (Peak)
- **Current available to power door furniture**: 650mA @12V*

**Environmental**
- **IP Rating**: IP65
- **IK Rating**: IK06
- **Temperature**: -15° to 50°C **

**Fingerprint***
- **Type**: Optical
- **Resolution**: 500 dpi
- **Sensing area**: 16mm x 19.0mm
- **Image size (pixels)**: 272x320
- **EER**: < 0.1%

**Functionality**
- **Inputs**: Four analog inputs – voltage provided
- **Outputs**: 2 relays volt free contacts (dry contact)

**Switchable wet outputs**
- **Rating**: Internal : Internal: 12Vdc @ 1.3A
  External: Up to 30Vdc @ 2A (60W)

**Memory**
- **128 MB RAM, 256MB NAND Flash**

**Expansion**
- **Micro SD slot for optional memory expansion, Micro SD card fitted.**

**RTC Battery Backup**
- **3.0V rechargeable Lithium-ion**

**Off-line Database**
- **Cardholders**: 123,000 (two fingerprint templates per cardholder)
- **Transactions**: Up to 50,000
- **Card technologies**: MIFARE (CSN), DESFire (CSN), CEM DESFire 3DES, CEM DESFire AES, iCLASS, iCLASS SE, PicoPass

**Communication Interface**
- **To Exit Reader**: RS485 (CEM S610 Exit Reader/ CEM S700 Exit Reader), Wiegand (3rd party read heads)
- **To System Host**: 10/100 Base-T TCP/IP using CAT5e Unshielded twisted pair cable
- **Cable Connection**: RJ45

**Operating Modes**
- **Door Mode, Interlock, Control Post, Passenger, Multi-swipe, Global PIN, Entry Check list Mode**

**Special Features**
- **533 MHz DSP**
- **FIPS201 approved algorithm**
- **Robust optical Solid and scratch-free sensor surface**
- **Reliable high quality fingerprint image for wet & dry fingers Sensor automatically optimises fingerprint image**

**Verification time (1:1) 0.55 sec**

* Only PoE+ IEEE802.at provides power for both the terminal and additional door furniture (current available to power door furniture: 650mA). Power requirements beyond this limit will require the DIU230

**Biometric verification performance and accuracy can vary, subject to environmental conditions such as ice, snow etc.**

*** Equal Error Rate. Manufacturer's data related to fingerprint match only. EER is dependent on databases
