AC2000 SECURITY HUB IS A POWERFUL, UNIFIED SECURITY APPLICATION FOR MONITORING AND MANAGING ALARMS AND EVENTS.
SECURITY HUB IS THE CENTRALIZED ALARM AND EVENT MANAGEMENT APPLICATION FOR AC2000; SEAMLESSLY BLENDING IP SECURITY SURVEILLANCE SYSTEMS AND ALARM PROCESSING INTO A SINGLE, SIMPLE AND INTUITIVE USER INTERFACE.

With its highly configurable central command and control interface, AC2000 Security Hub manages all events and alarms within the AC2000 access control system and its highly integrated sub-systems; including video, fire, intruder and building management systems.

**AC2000 Security Hub helps businesses:**

- simplify security operations
- reduce risk and response times to critical events
- increase situational awareness
- improve alarm accountability

*Seeing is believing. Request your demo today!*
UNIFIED COMMAND AND CONTROL

AC2000 SECURITY HUB IS ONE INTERFACE FOR ALL COMMAND AND CONTROL FUNCTIONS, OFFERING BETTER VISION OF PRIORITY ALARMS TO IMPROVE SECURITY AND HELP INCREASE OPERATIONAL EFFICIENCY.

SECURITY HUB TRANSMITS REAL-TIME GRAPHICAL, AUDIO AND TEXT-BASED INFORMATION ON ALL ALARMS THAT OCCUR WITHIN AC2000 SECURITY MANAGEMENT SYSTEM AND ITS INTEGRATED SYSTEMS.

IN ONE ALARM AND EVENT MANAGEMENT APPLICATION SECURITY PERSONNEL CAN PROCESS ALARMS, VIEW ASSOCIATED VIDEO, RUN AD HOC REPORTS AND SO MUCH MORE.

*Requires supported AC2000 video integration license. ** Requires AC2000 Security Hub Maps license
REPORTING TOOLS
In-built, easily accessible reports include Alarms, Alarm Priorities, Alarm Escalation or User Reports, giving access to data on the go to help improve your site security.

MULTIPLE USERS AND SITES
AC2000 Security Hub provides local or multi-site security management and enables simultaneous operation by multiple users, who can each design and save their own custom screen layout templates.

HIGHLY SCALABLE & RESILIENT
AC2000 Security Hub boasts all the resilience and reliability of prior AC2000 AED (Alarm Event Display) application. Security Hub is highly scalable with the ability to handle over 2 million alarms in large, complex sites.

VIDEO MICRO VIEWER
View live and pre-recorded video footage for specific events. Two micro-viewer apps with associated camera pop-up lists are displayed within Security Hub.*

SIMPLE & INTUITIVE
A powerful and highly intuitive user interface that can handle advanced alarm and event functionality and processes. The security of your site is clearly visible and more manageable.

GUARD TOURS
Guard Tour Events displays an overview and brief summary of each event, including the device it occurred on, the guard who triggered the event, the type of event that occurred and the tour it relates to.

USER RESTRICTIONS
User Restrictions determine who is allowed access to specific configured maps, devices and alarm types based on assigned criteria.

WORKFLOWS
Choose how to view and process alarms using a set of user determined sequential actions configured to ensure the correct course of action is followed.

EASILY CONFIGURABLE
AC2000 Security Hub facilitates the creation of a sophisticated site-specific command and control centre that is highly configurable by security operators to meet your unique security requirements.

INTEGRATED SYSTEMS
AC2000 Security Hub provides monitoring and processing of alarms and events across multiple security systems including access, video, intrusion, fire and building management systems.

GRAPHICAL MAPS
Maps, Icons and Sounds: User friendly graphical maps, icon type, style, colour, angle, annunciation, and sounds can be configured to meet your needs.*

AC2000 SOFTWARE OPTIONS

**AC2000**
- Powerful and fully integrated access control & security management system
- Supports a scalable number of doors
- Supports a scalable number of cardholders
- Highly customizable
- High level integrations with leading video, intruder, fire & perimeter detection partners
- Ideal for medium to large scale complex projects

**AC2000 Lite**
- Cost effective access control for smaller sites
- Supports up to 128 doors
- Supports up to 5 workstations
- Supports up to 10,000 cardholders
- Encompasses core AC2000 software modules
- Integration with selected video and intruder systems
- Ideal for small to medium sized projects

**AC2000 Airport**
- Integrated airport-specific access control & security management system
- Proven in leading airports around the world; including 80% of UK Airports
- Highly customizable
- Aviation features include check-in-desk enabling, passenger segregation, air-bridge monitoring
  *And much more.*
